

**12-pole cable with an 8-pin M12 connector on one end
and open wires on the other**

CP18

Introduction

For installations that need a defined M12 connection on the device side and flexible wiring on the system side, this 12-pole cable provides a practical accessory for LPSD18, HD2016 and HD9408.3B products.

The cable has an 8-pin M12 connector on one end and open wires on the other side, supporting direct integration into the customer's wiring environment. Two lengths are available: 5 m as CP18.5 and 10 m as CP18.10.
