

Installation note

for Windows Vista and Windows 7 operating systems.

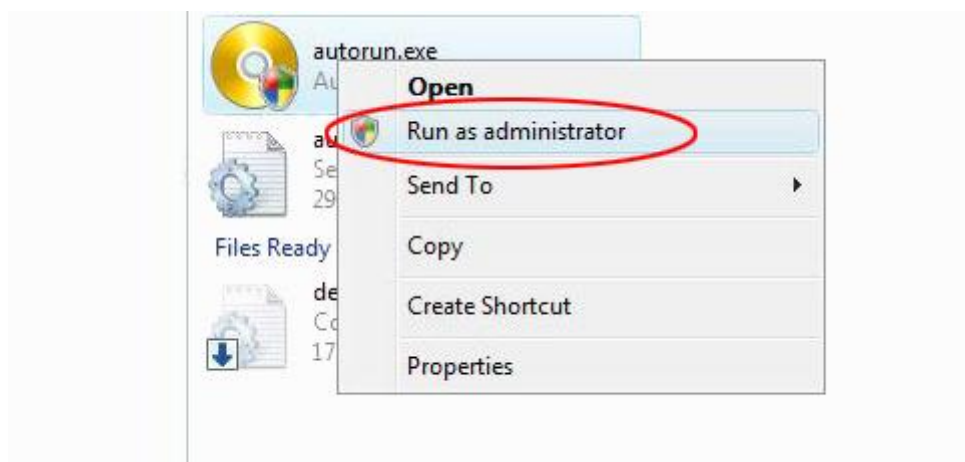

For software set up administrator privileges are requested.

If the operative system prevent the software to open:

1. Re-start the PC as user with administrator privileges.
2. Insert the CDRom and, at the following window, choose the voice "*Open folder to view files*".

3. In the following window, right click on the file "*Autorun.exe*" and choose "*Run as administrator*":

4. Proceed following the instructions supplied in the sections "Documentation" and "Guide to USB setup/removal".

USB DRIVER INSTALLATION:

- **WITH WINDOWS 7 OPERATING SYSTEM IT IS NECESSARY TO RESTART THE PC DISABLING THE DRIVERS SIGNATURE REQUEST.** When Windows restarts, press F8 to display the "*Advance Boot Options*" menu, then select the "*Disable Driver Signature Enforcement*" option.
- **WITH 64-bit OPERATING SYSTEMS, EVEN AFTER INSTALLATION IT IS NECESSARY TO DISABLE THE DRIVERS SIGNATURE REQUEST EVERY TIME THE PC IS RESTARTED.**
